- 30** Retta
- 30** Dimo
- 32** Scala
- 34** Lago
- 36** Capri
- 36** Monobloc

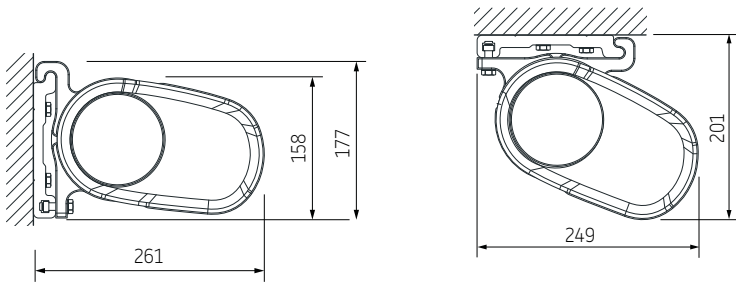

Marsala

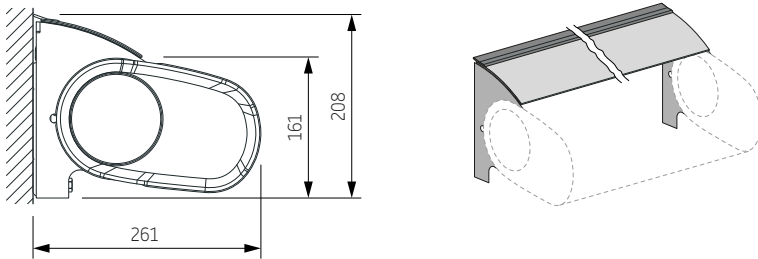

Maximum width:
600 x 400 cm
700 x 300 cm

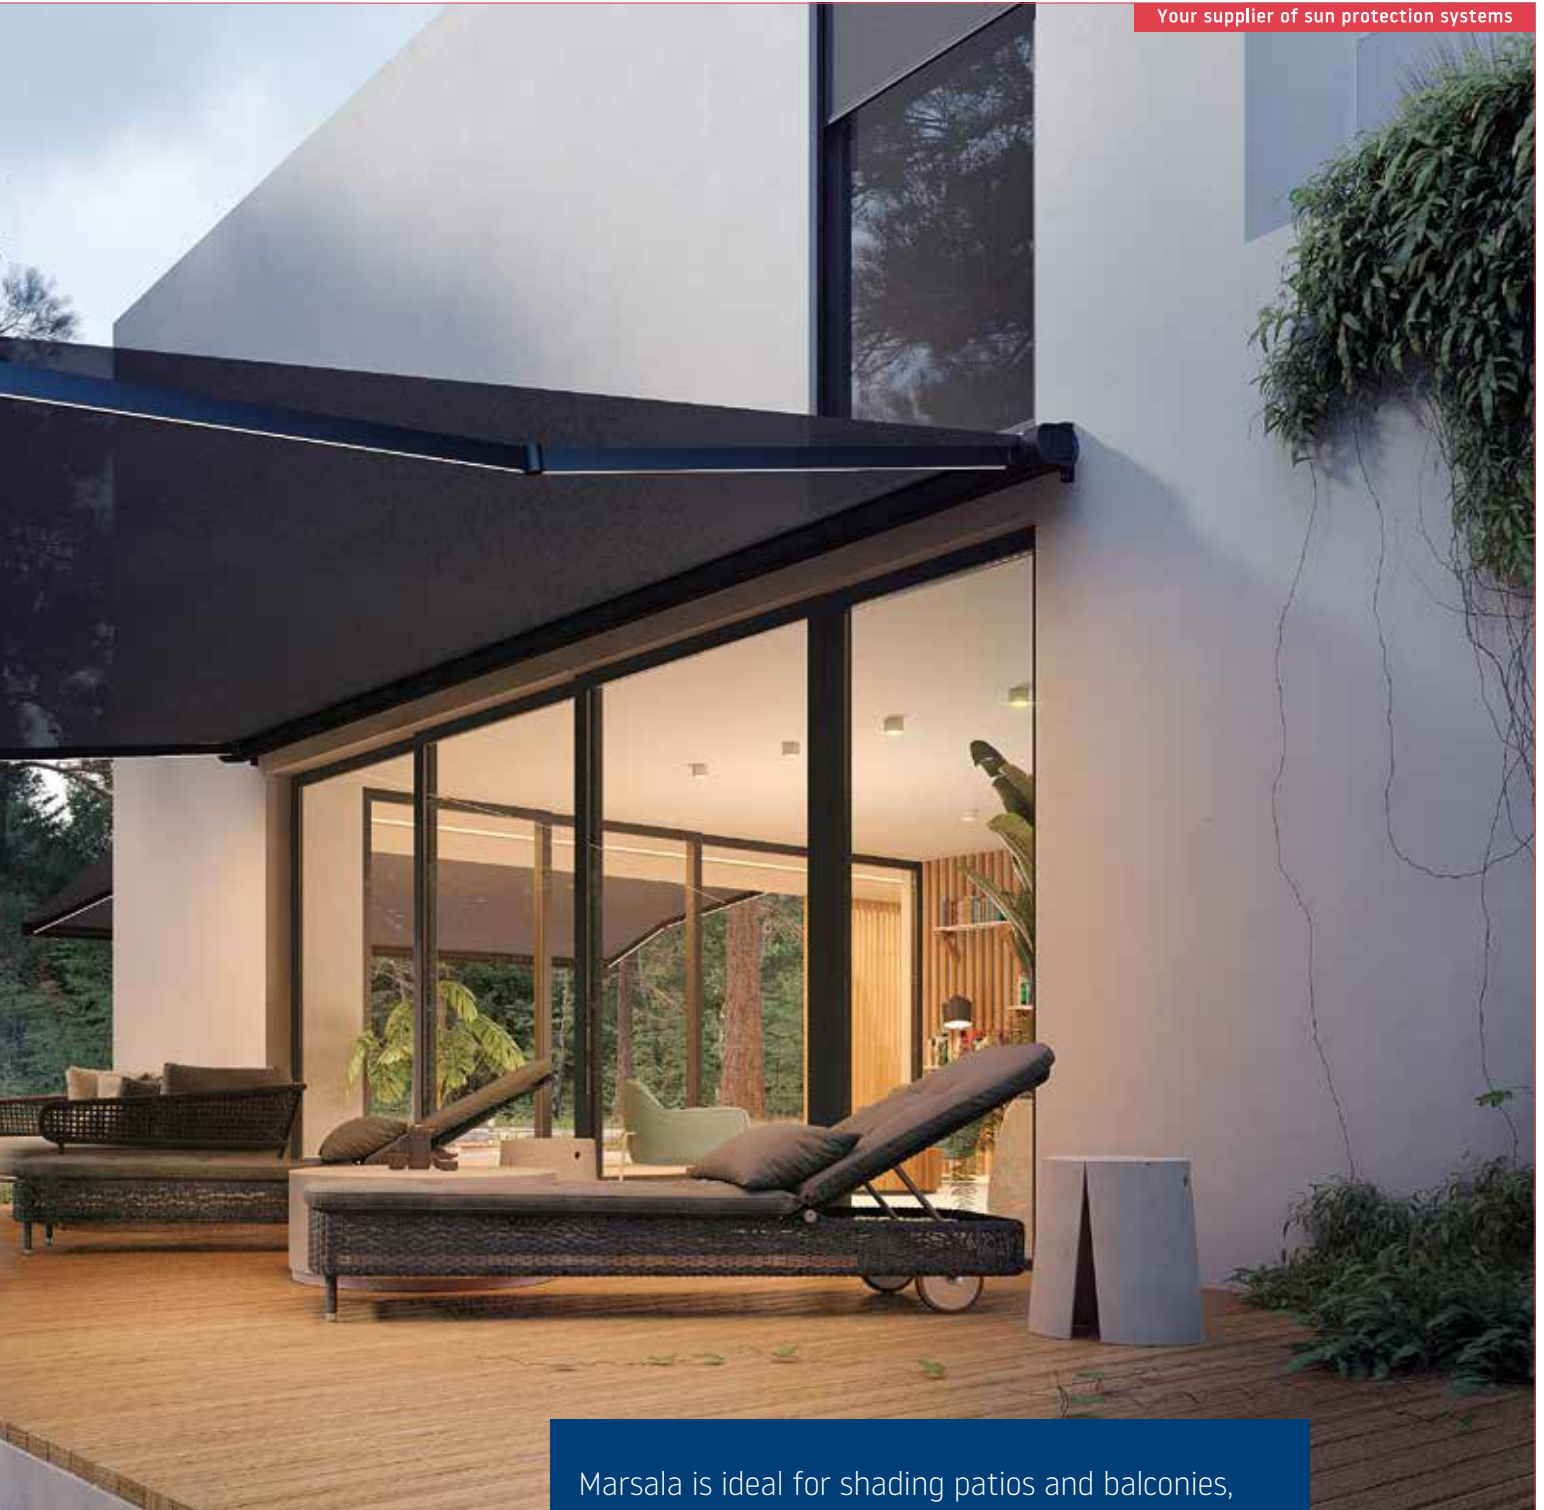

Drive:
electric

LED lighting (optional):
in the front slat, in the arms

Cover rail

Marsala is ideal for shading patios and balconies, and for protecting windows, displays and verandas from the sun. It has an elegant and modern design. One set of arms can cover an area of 600 x 400 cm.

The cassette protects the fabric and arms from wind, snow, rain and dust. It can be mounted on walls or ceilings and can even have LED lights integrated into the arms and front profile.

open

Lago offers many technical and functional advantages. The quality of its finishes gives an aesthetic appeal down to the smallest detail.

With Lago, we succeed in protecting large spaces thanks to a reach capacity of up to 4 metres and a width of up to 12 metres in 4-arm installations.

There is an option of LED lighting integrated into the cassette, arms, and front slat. This awning model offers four box options: cassette, semi-open, and open.

Scala provides an excellent design and technological solution for modern architecture. The awning's aesthetics make it perfect to integrate with facades thanks to its stylised construction and linear finishes.

Scala is part of the minimalist architecture styles, but offers advanced technical features to accommodate large dimensions due to the choice of several arms.

Box awnings

Scala

Max dimensions:

600 x 400 cm with 2 arms

700 x 400 cm with 3 arms

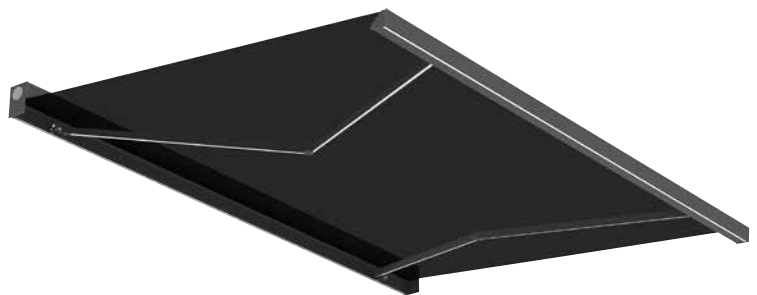

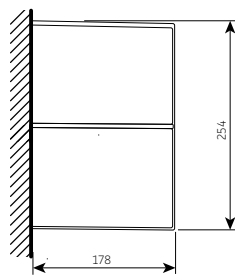

1200 x 400 cm with 4 arms

LED lighting:

in the box, in the front slat, in the arms.

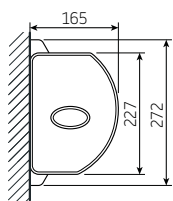

Capri

- semi-cassette without side covers CAPRI
- semi cassette CAPRI
- full cassette CAPRI

Maximum width:
500 x 295 cm

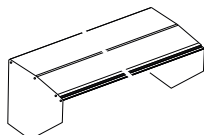

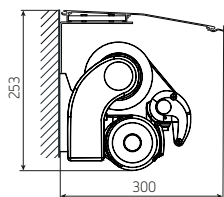

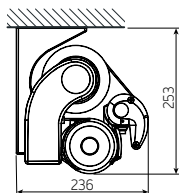

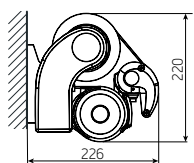

Drive:
crank or electric

Monobloc

Max dimension:
600 x 300 cm
550 x 350 cm

Operation:
crank or electric

The Capri awning has a sturdy casing with a maximum size of 550 x 285 cm and it is ideal for self-assembly.

It is characterised by its sun protection and heat protection functions. Because the Capri casing closes precisely, it is best suited for areas that are exposed to a lot of rain and dirt.

7 Drop arm awnings

40 Carre

42 Markisolette

Carre drop-arm awnings have a movable, tilting arms that allow easy access to the outer window sill. They are mounted on the outside of windows to protect the interior of the room from overheating and to control light intensity for a more comfortable stay inside.

These awnings are made from a durable fabric that is resistant to adverse atmospheric conditions. Durability is ensured by PVC-coated glass fibres. Windows protected by such blinds, unlike external blinds, allow natural light to enter the room without the need for additional lighting.

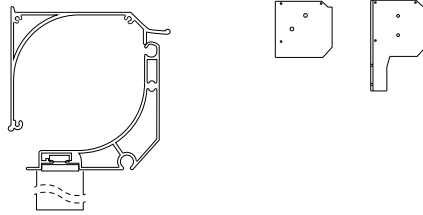

They are often used in multi-storey buildings. Carre offers effective solar protection while maintaining good visibility from the window downwards.
